

Welcome to ICHE 2016

Prof. Pao-Shan Yu

Prof. Wei-Cheng Lo

Distinguished Guests, Ladies and Gentlemen:

ICHE is the well-established series of bi-annual Hydrosience & Engineering conferences, which began in Washington, DC in 1993. It is great honor to welcome you to present your research; hear about the latest discoveries, trends, and challenges in the field; and network with colleagues that can enhance your career.

The ICHE 2016 conference is jointly hosted by National Cheng Kung University (NCKU) and International Association for Hydro-Environment Engineering and Research (IAHR). Meeting brings together the entire hydrologic and engineering communities from across the globe for discussions of latest scientific advancements, emerging technologies, and directions in issues relevant to Hydro-science & Engineering for Environmental Resilience. The meeting offers more than 200 oral and poster presentations, a broad range of general sessions, unique mini symposiums, cross-sectors networking, career advancement opportunities, and many exhibitors showcasing the latest relevant research tools and services that improve knowledge of various drivers of changing earth and water-related disasters.

On behalf of ICHE 2016 committee, we would like to express our sincere appreciation to all the organizers and everyone who contributes efforts to this conference. We wish all the participants a very pleasant stay at this ancient city Tainan, and overall success of the ICHE 2016.
